
June Check-in — Sales (TSM · Joe's Team)

Monthly Claude usage update

01 Usage

Mainly used Claude to build and automate my recurring TSM ops workflows — turning manual Google Sheet + CRM tasks into reusable, repeatable “skills” Claude can re-run anytime.

02 Projects

- **Cross-sell Bonus Assignment + VIP Bump** — auto-fills bonus codes & VIP tiers, then pastes into the TL Master Sheet
- **Monthly TM Sales Commission payout** — pushes commission rows into each telemarketer's personal Sales Tracker
- **Weekly Leads Balance check** — counts unassigned leads per project and flags which need top-up
- **Weekly Telemarketing PPT report**

03 Outcomes

- Cut these tasks from **30 mins – 2 hours** down to **5–10 mins** each run
- Fewer manual copy-paste errors, more consistent formatting
- Once built as skills, anyone on the team can re-run them

04 Next Focus (June)

- Schedule the weekly/monthly ones to run automatically on cadence
- Extend automation to other tasks when needed (after migrating to VM team)
